EDUCATION

Grambling State University

Bachelor of Science in Computer Science & Data Analytics (UG Certificate Program)

Expected Graduation: May 2028

GPA: 4.0/4.0

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Distributed Systems, Artificial Intelligence

Awards: Achievement Award Scholar, President's List, TMCF Scholar

TECHNICAL SKILLS

Languages: Python, Golang, HTML5, CSS3, JavaScript, SQL (MySQL)

Frameworks & Libraries: React, Next.js, Tailwind CSS, Node.js, Scikit-Learn, PyTorch, TensorFlow

Tools: APIs, VS Code, Figma, PostgreSQL, MongoDB Atlas, Git, Kubernetes, Vercel

EXPERIENCE

Netskope

Software Engineering Intern (Security Intelligence Operations Team)

June 2025 – August 2025

Santa Clara, CA

- Orchestrated and optimized secure platform access for cross-functional engineering teams through **Okta**, **Jira**, and **Kubernetes** (Rancher), implementing a structured ticketing system that increased workflow efficiency by 10%.
- Engineered and automated SSL certificate deployment workflows in **Python** and **Golang**, replacing manual Google Sheets updates, saving 5+ hours of repetitive work weekly, and improving operational efficiency and accuracy by 40%.

PwC X Outamation

AI Extern

February 2025 – April 2025

Remote

- Automated financial data extraction from various documents using **OCR**, **Python** PDF libraries (**PyPDF2**, **PyMuPDF**, **pdfplumber**), **Label Studio**, **NLP** and **Computer Vision**, achieving 70% accuracy and processing documents 2x faster.
- Built **RAG pipelines** with **LlaMA Index**, **Mistral-7B**, and **LangChain's RetrievalQA**, using metadata filtering and vector search to automate classification and generate insights from mortgage documents, reducing manual tasks by 50%.

Grambling State University

IT Student Assistant

October 2024 – PRESENT

Grambling, LA

- Delivered technical support to 100+ students and faculty daily, troubleshooting diverse hardware and software issues to maintain 99% uptime, and led orientations that cut policy violations and increased resource utilization by 30%.
- Co-engineered a **MERN** stack web application to replace paper check-ins, improving lab usage data accuracy by 50% and enabling real-time tracking of 500+ student visits for optimized staffing and resource allocation.

PROJECTS

AgriSmart

- Developed an agricultural platform for African farmers featuring inventory management, investor matchmaking, and an online marketplace using **Next.js**, **FastAPI**, **PostgreSQL**, and **Firebase** to handle secure multi-role user flows.
- Integrated an **LLM-powered** farming assistant (**LangChain + Mistral-7B**) for personalized advice and **Stable Diffusion** for automated logo generation, enabling farmers to receive operational guidance and create digital marketing materials.

EcoTrack

- Engineered a responsive web application using **HTML**, **CSS**, **JavaScript**, and **Chart.js** to calculate and visualize carbon emissions, leveraging the **Carbon Interface API** to ensure 95% data accuracy.
- Optimized and Implemented a **Node.js** backend with secure **API** handling and asynchronous programming, reducing response time by 30%, to ensure efficient processing and seamless user experience.

LEADERSHIP AND INVOLVEMENT

Notion Student Club (Grambling Chapter)

Treasurer

Grambling, LA

November 2024 - PRESENT

- Collaborated with a team of 9 to organize productivity workshops using Notion and co-led Grambling State's first student-run hackathon with 100+ participants, managing a \$1K+ budget and raising \$1.5K+ in sponsorships to ensure its success.

Additional Involvement: ColorStack, CodePath (**Open-Source Contributor**), AI4ALL, Black Girls Code, Breakthrough Tech AI, Rewriting the Code, Girls Who Code, National Society of Black Engineers, Association for Computing Machinery (ACM)
